LED LIGHTNING

LED LIGHTING

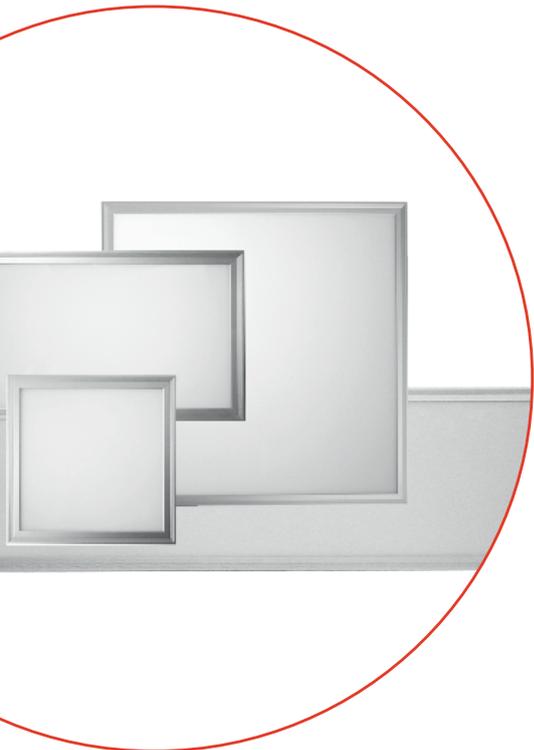

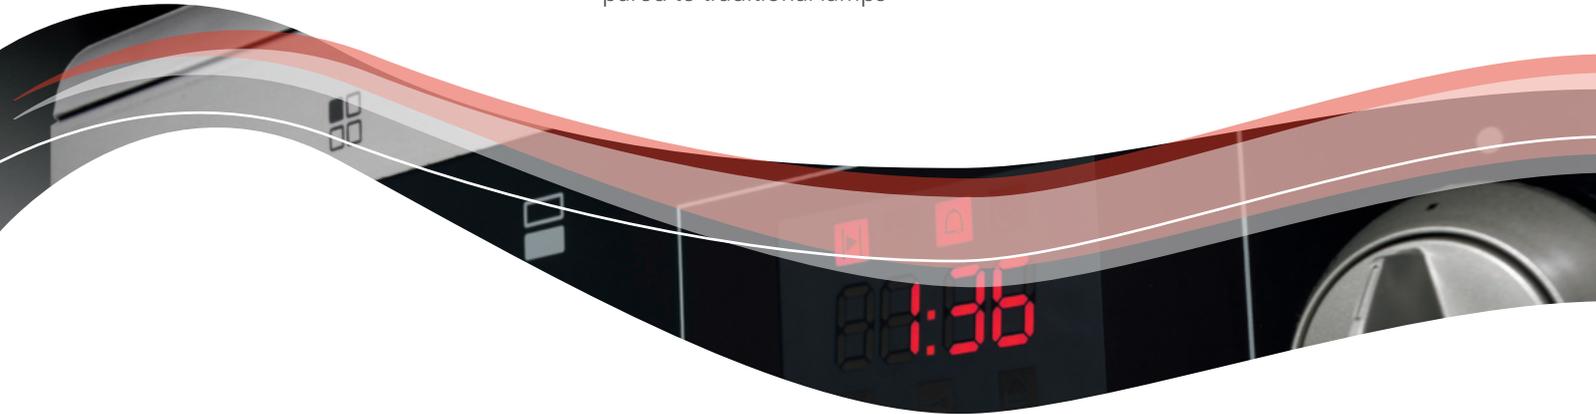

LED TUBE LIGHTS

LED Tube Lights are the ideal alternative with the most powerful luminous flux to fluorescent tubes. They are designed for a better energy efficiency, an extra-long lifetime up to 50.000 hours and give a more friendly environment.

Our tubes use the highest quality of materials to produce the most economical products.

FEATURES

- Available standard sizes 350/600/900/1200/1500mm
- Customized sizes are available upon request
- Warm white / daylight white
- Diffused / clear cover
- Wide Viewing Angle
- High brightness
- Overcurrent and short circuit protection
- No flickering
- Impact resistance, strong seismic capabilities, UV & IR free
- Great energy saving up to 80% compared to traditional lamps

LED PANEL LIGHTS

LED Panels are an ideal solution for places that need a good-quality and energy-efficient general lighting. The ultra slim design projects a perfectly even and bright illumination to directly replace the original ordinary fluorescent lamps

FEATURES

- Available standard sizes 300*300/600*600/300*600/300*1200
- Customized sizes are available upon request
- Warm white / daylight white/ CCT adjustable
- Dimmable
- High brightness and uniform illumination
- Less heat dissipation
- Long lifetime up to 50.000 hours
- Impact resistance, strong seismic capabilities, UV & IR free
- Great energy saving up to 80% compared to traditional lamps
